CHERNOBYL

Twenty Years Later

A Public Health and Environmental Assessment

On April 26, 1986 a fire at Ukraine's Chernobyl Nuclear Station resulted in the abandonment of seventeen villages, relocation of hundreds of thousands of people and a ban on export of the region's agriculture. As California moves away from coal and petroleum-based electricity, the time is right to reflect on nuclear power, its promise as well as its problems. The twentieth anniversary of the Chernobyl accident offers this opportunity.

Speakers include:

- **Yelena Zmushko** will show her autobiographical film *Chernobyl 20*.
- **David R. Marples**, University of Alberta, on "Twenty Years after Chernobyl: Dealing with a health and demographic crisis in Belarus."
- **Daniel Hirsch**, president, Committee to Bridge the Gap, on "Chernobyl's Victims: The extent of radiation poisoning, cancer and other disease."
- **Angelina M. Galiteva**, chairperson, World Council for Renewable Energy, on "Strategic Opportunities in Renewable Energy."
- **Rochelle Becker**, president, The Utility Reform Network, on "Nuclear Accidents: Can it happen here?"

Sunday, April 23, 2006

2:00-5:30 PM

La Kretz Hall Auditorium (Room 110)

Cost: free-of-charge

Parking: \$8. Enter on Westholme off Hilgard. Ask for a pass for parking structure # 2
