| Harry Reid | 67% |

Obviously Murkowski, Craig, and Lott are experts on what harms the environment.

Don't Be Fooled.

S. 1287 is a bill only a polluter could love. It undermines the Environmental Protection Agency's existing statutory authority to set standards to protect public health and the environment from radioactive releases, by blocking EPA from setting standards for Yucca Mountain until June 1, 2001. The bill also contains unrealistic and unworkable milestones, as well as burdensome and unworkable transportation provisions that do not provide a commensurate improvement in safety.
