ADJUDICATIONS STAFF

Docket No. 50-219-LR

SERVED February 5, 2007

SECRETARY

The Honorable Jim Saxton
United States House of Representatives
Washington, D.C. 20515

Dear Congressman Saxton:

I am responding to your letter of January 18, 2007, sent to Chairman Dale E. Klein, in which you call for the U.S. Nuclear Regulatory Commission (NRC) both to analyze the potential environmental impacts of a terrorist strike in the Oyster Creek Environmental Impact Statement and to grant the State of New Jersey's request for a hearing on this issue.

An appeal from the Atomic Safety and Licensing Board's February 27, 2006 decision on this matter is currently pending before the Commission. Due to the nature of the Commission's adjudicatory role, I trust you will understand that all members of the Commission must remain impartial during the pendency of this case. It would be inappropriate at this time for any of them to discuss or comment on issues involved in this matter.

A copy of your letter and this response will be served on the participants in the Oyster Creek proceeding.

Sincerely,

A handwritten signature in cursive script that reads "Annette L. Vietti-Cook".

Annette L. Vietti-Cook

Dear Dr. Klein:

I write to you today regarding a recent court ruling relating to the security of nuclear power plants.

As you know, on January 16, 2007, the United States Supreme Court denied the appeal request of Pacific Gas and Electric (PG&E) in the case of PG&E v. San Luis Obispo Mothers for Peace. Instead, the highest court let stand a ruling handed down by the Ninth Circuit Court of Appeals in San Francisco. To summarize, the court ruled that when considering an application for a new nuclear power plant, the Nuclear Regulatory Commission (NRC) must require the licensee to include the potential environmental impact of a terrorist strike against the plant in their Environmental Impact Statement (EIS).

As a longtime advocate of increased security at nuclear power plants, I commend the court for issuing this long-awaited ruling. I fully support the need to include such crucial information in an EIS. In addition, I believe these conditions should logically also be met by those wishing to extend their operating licenses.

It is my understanding that an EIS for the Oyster Creek Generating Station in Ocean County, N.J. will be released this Friday. In view of the new ruling, I want to ensure that the potential environmental impacts of a terrorist strike on Oyster Creek were also included in the EIS being released on Friday, or in a required addendum to be released in the near future. While I am aware the NRC takes security-related issues into account on a daily basis, it is critical that in the case of Oyster Creek we have a full understanding of the environmental impacts of a terrorist strike in New Jersey, the most densely-populated state in the union.

Dr. Dale E. Klein
January 18, 2007
Page 2

Additionally, it is also my understanding that the NRC had postponed a decision on whether to grant the hearing request of the State of New Jersey on this same subject until after the decision of the Supreme Court. Now that this has occurred, I urge the NRC to grant New Jersey's hearing request. It is clear that the decision of the Ninth Circuit Court underlines the fact that terrorism vulnerability needs to be taken into account during the NRC decision-making process.

Thank you for your consideration of my request.

Sincerely,

A large, stylized handwritten signature in black ink, appearing to be 'J. Saxton', is written over the word 'Sincerely,'.

Jim Saxton
