Re: Additional Commitments Associated with the Drywell Shell (License Renewal Proceeding for the Oyster Creek Nuclear Generating Station, Docket No. 50-219)

Dear Secretary:

AmerGen Energy Company, LLC (“AmerGen”) informed the Commission on March 14, 2006 that it would be formally docketing commitments related to the sand bed region of the drywell shell of the Oyster Creek Generating Station. These commitments are in response to comments made by NRC Staff license renewal audit team members, and include a commitment to perform ultrasonic testing (UT) measurements in the sand bed region once every ten years during the period of extended operation. Enclosed is a copy of the commitment letter, as submitted to the docket yesterday.

Sincerely,

Alex S. Polonsky
