President Obama:

The current nuclear crisis in Japan has deepened my commitment to our planet.

I urge you to reverse your support of nuclear power. It's not clean, it's not cheap, and it's not safe.

I am opposed to any loan guarantees to the nuclear energy industry.

I support shutting down nuclear plants operating in seismically active areas of the U.S. and a moratorium on building new nuclear reactors.

I support investment in clean, renewable energy.
